Government Schools Award
Private Schools Award
Outstanding Projects Award category for schools in the safety and traffic education field
Innovation and Creativity category for students
The Ideal Safety Family Award

Our Students, Our Responsibility

The Government of the UAE has always viewed the safety of students as a top priority in all its initiatives, projects, and programmes. In particular, this vision has been adopted by several government institutions and entities that are directly concerned with preserving the students' lives and ensuring their safety and security wherever they are. These entities include the Ministry of Interior, the Ministry of Education, the various roads and transport authorities within the UAE and other stakeholders.

In this context, the Emirates Transport Awards for Traffic Safety and Education is one of the few qualitative initiatives that have stood the test of time, now running for more than two decades, and continuously providing a broad and active space for embracing the creativity of the school community in order to fuel their innovative ideas in emphasizing the importance of students safety.

We all agree that one of the most important factors in advancing the educational process as a whole is the presence of a strong and integrated learning environment that is consistent with the goals of ensuring the safety of students in the school buses, because they are a priceless treasure that we hold in trust. That is why, we are keen to undertake the responsibility of protecting them and ensuring their happiness as well as their safety, and this is a huge responsibility that in no way shall be abdicated nor neglected under any circumstances.

Steadily, the Awards earns more popularity and sparkle, with a noticeable increase in the number of participants in categories, which definitely helps achieve our goals of promoting a culture of safety among young people, their parents and road users.

There is no doubt that our country is witnessing continuous development across all sectors, including transport, and the supporting infrastructure, in addition to the launch and adoption of new technological practices, whether at the level of the regulations adopted in the transport sector, or standards of service delivery or transport specifications, or the skills, abilities and experience that should be possessed by bus drivers and supervisors, along with raising the awareness among passengers and road users including drivers and pedestrians.

The new edition of the Guidebook for the Emirates Transport Awards for Traffic Safety and Education, in its 21st edition under the slogan «Our Students, Our responsibility», comes in conjunction with the comprehensive awareness campaign which is implemented by various governmental and private institutions and entities at the start of the new academic year 2018/2019.

We hereby invite all members of the school community, especially students and their parents, to display their innovative potential not only through the projects they will present in the award categories, but also in every detail of their lives as a whole. Because innovation is a culture and a lifestyle in the UAE, it rhymes with one comprehensive system of visions, plans and orientations adopted by the Government of the UAE to achieve its overall strategy of enhancing the role of innovation as a key driver of government development, of community development and economic growth, as well as promoting the reputation of the UAE as a global innovation centre.

As HH. Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, said: «Innovation today is not an option but a necessity, not a general culture but a business method. Governments and companies that do not renew or innovate lose competitiveness and control. They are bound to regress,"

This is how our visionary leaders implement their vision of life and their vision of the way they serve their people, their country and their society. This confers on us a great responsibility of continuing on the same path to achieve the most rewarding results, and this is the message that Emirates Transport is sending out to contribute to the creation of a pioneering and creative generation that is going to lead the change and translate the hopes and aspirations into efforts that help build a more brighter future.

God bless

Mohammed Abdullah Al Jarman
Emirates Transport General Manager

The award aims to spread a culture of safety and traffic education through the recognition of individual and institutional initiatives that influence the country's local school community. The award objectives can be summarised as follows:

01 Encouraging the spirit of initiatives, creativity, and excellence on the level of education, culture, society, and field level regarding safety and traffic education.

02 Honouring the interested groups and entities, including institutions and individuals that contribute through exceptional achievements and innovations to the field of safety and traffic education.

03 Honouring individuals that contributed to all fields with their efforts, time, money, and showing them the moral support and appreciation they deserve.

04

Working on initiatives and projects development as well as supporting and encouraging entities that help and support excellence, and institutions that implement it, and provide them with constant and continuous bestowments in the field of safety and traffic education.

05

Creating interest in order to attract the attention of individuals and institutions to innovation and excellence in the field of safety and traffic education.

06

Further improving the school transport system through the adoption of pioneering ideas, projects, and innovations.

07

Raising the awareness of community members including road users, parents, and transported students of safety and traffic education as well as paving the way to creativity and the development of the best practices in the field of traffic safety.

The award is open to public and private schools, technology institutes, and public educational institutions. It focuses on activities and efforts of traffic safety awareness. The award is divided into five categories, as follows:

01

Government Schools category

Open to all public schools in the UAE and is divided according to the four educational phases (kindergarten, primary, intermediate and secondary).

02

Private Schools category

Open to all the private schools in the country (branches of the same school can participate separately). **Three awards are allocated for the first three nationally.**

03

Outstanding Projects awards for schools in the safety and traffic education field

It is awarded for the best 8 projects executed by all schools nationally.

04

Innovation and Creativity category for students

The award is given to innovations and creations that serves the value of safety and contribute to spreading the traffic education culture according to this year's Awards slogan "Our Students, Our responsibility". The entries must help develop Emirates Transport's school transport service.

The category is open to all students in public, private and technical institutions can participate in this category of award. Students are categorised as follows: Kindergarten, Primary, Intermediate and Secondary.

05

The Ideal Safety Family Award

The award is for the ideal families that effectively participates in instilling the principles of safety to their children, both at home and in the school.

جائزة مواصلات الإمارات للسلامة و التربية المرورية
Emirates Transport Awards for Safety & Traffic Education

Measure the results of initiatives, projects and strategic objectives related to safety and traffic education. 2. Make use of the achieved results in the development of traffic safety and education systems, initiatives and projects.	<ul style="list-style-type: none"> • Has the schools success in safety and traffic education been measured? Please indicate the results measured and achieved over a period of more than one year (preferably 3 years) and provide a brief explanation of the volume and nature of the achieved (material/intangible) success, (preferably support the answer with statistics and figures to clarify the nature and volume of success).
20			<ul style="list-style-type: none"> • How has the implementation and dissemination of school initiatives or projects been implemented in other schools in the country? .Provide appropriate documentation.
21			<ul style="list-style-type: none"> • Has the school taken any developmental or corrective action with the aim of improving safety outcomes?

02

Outstanding School Projects Award Criteria in the Safety and Traffic Education Field:

First: conditions for participation in the outstanding school projects award:

1. Any outstanding project seen suitable by the school can be nominated, on condition that it is in line with the award's objectives in the safety and traffic education field.
2. It is not required that the school participates in one of the two awards, public schools and private schools, before nominating its outstanding projects.
3. Participation is done through preparing only one file that meets all the set criteria, with the papers and supporting documents included.
4. The winning project cannot participate for two consecutive years. The school can participate with a different project every year even if it won the previous edition.
5. The school cannot participate with more than one project a year.
6. The project length cannot be less than one semester.
7. The corporation has the right to retain the documents and material and benefit from them in any manner it sees fit.
8. The deadline for receiving the initial participations is the end of January 2019.
9. The project will be evaluated by the executive committee in the branches through a field visit, in order to see the level of project progress. The committee will prepare reports on the visit to be given to the judging committee.
10. Request for participation is by completing the participation form within the school projects category in the field of safety and traffic education **(Form 2)**.

Second: participation criteria:

1. Please write a brief commentary on the school and its achievements which qualify it for winning the award.
2. The number of supporting documents must not exceed 4 pages

No.	Criterion
1	Please give a brief idea of the nature, content, and objectives of the initiative.
2	Please explain the reasons and conditions under which the initiative/project was proposed.
3	The relation of the initiative/project to safety and traffic education.
4	Why do you think that the initiative/project is worthy of winning in the school projects category?
5	Has a clear plan been set and approved to implement the initiative/project?
6	Was there a mechanism or performance indicators to measure the extent of the initiative/project's success and target achievement?
7	Did the school succeed in applying and executing the contents and activities of the initiative/project as planned? In case the initiative/project succeeded in partially or fully achieving its objectives, please explain briefly the range and nature of achieved success (material or immaterial), while stating the positive effects on individuals, local community, and other institutions. (It is preferable that the answer is supported with statistics and figures to clarify the nature and range of success)
8	Did the school take developmental or corrective procedures with the aim of improving the initiative/project's results?
9	How did the units and other schools in the institution benefit from the application and generalisation of the initiative/project?

03

The Ideal Family Award Criteria:

First: Conditions for participation in the ideal family award:

1. The school management nominates the family which it feels has shown the excellence, care, and commitment to the safety programmes among the families of students who study at the school.
2. Applying for a participation request through filling the participation form within the Ideal Family category **(Form 3)**.
3. Participation is done through preparing a file with the answers on the criteria, attached with the supporting documents and evidence.
4. The winning family has the right to participate in two consecutive editions. The performance comparison system for the two participations will be used.
5. The school can nominate more than one family in one edition. Each family is given a separate file.
6. The nominated family can organise events in other schools.

Second: participation criteria:

1. Please write a brief commentary on the family and its achievements which qualifies it for winning the award.
2. The supporting papers and documents must not be more than 3 pages

No.	Main Criterion	Secondary Criterion
1	Benefits and roles	Explain why your family is described as distinguished in safety and traffic education.
		State the mechanism of role distribution in the family to achieve safety in the house, bus/vehicle, and school.
2	Participations and achievements	The activities and programmes the school has done in order to boost the concepts of safety and traffic education.
		Explain the level of cooperation between the family and school management during its participation in the school programmes and activities.
		State the extent to which the family benefited from the programmes offered by the interested entities and how it was spread in the family.
3	Results	What are the future plans for the family in the safety and traffic education field (they must be realistic and distinctive)?
		What are the fruitful results achieved by the family in its distinction in the safety and traffic education field?

04

Outstanding School Projects Award Criteria in the Safety and Traffic Education Field:

Participation in the award is allowed for creations and innovations that enhance the value of safety and contribute to spreading the culture of traffic education. Entries should contribute to the development of the school transport services in ET
